Composition of the Board

The Board currently comprises seven Directors, with a majority of whom being non-executive Directors (including independent non-executive Directors), of which one is an executive Director, two are non-executive Directors, and four are independent non-executive Directors. During the year of 2016 and up to the date of this report, the composition of the Board and its changes are as follows:

Board Diversity Policy

The nomination committee of the Company (the "Nomination Committee") reviews and assesses the composition of the Board and makes recommendations to the Board on the appointment of new Directors and Senior Management based on its terms of reference.

The Nomination Committee made an annual review on the composition of the Board with reference to a number of factors, including but not limited to diversity. The Company has complied with paragraph A.5.6 of the Code Provisions, with respect to board diversity during the year. Further details on the review of the composition of the Board are set out in the section headed "Nomination Committee" below.

Chairman and Chief Executive Officer

According to paragraph A.2.1 of the Code Provisions, the roles of the chairman and chief executive of a listed issuer should be separate and should not be performed by the same individual. As the Company has not yet identified a suitable candidate to be the chief executive officer ("CEO") during the year of 2016, Mr. Li Ning, the Executive Chairman and Interim CEO of the Company, assumed the role of chief executive officer during the year. Therefore, there was no separation of the roles of the chairman and the chief executive as both roles are currently undertaken by Mr. Li Ning. Notwithstanding the above, the Board is of the view that the assumption of the roles of Executive Chairman and Interim CEO by Mr. Li Ning will provide the Group with consistent and steady leadership, and is particularly beneficial to the planning and implementation of the Group's business strategies. The Board also believes that the current arrangement is in the interest of the Company and its Shareholders as a whole.

In addition, the operations and management of the Company is constantly subject to the scrutiny and valuable contributions of the independent non-executive Directors. The Board will continue to review the management structure regularly to ensure that it continues to meet these objectives and is in line with industry practices.

Principal Responsibilities of the Board

While delegating the authority and responsibility for implementing business strategies and managing the day-to-day operations of the Group's business to the management, the Board is collectively responsible for formulating the strategic business direction of the Group and setting objectives for the management, overseeing its performance and assessing the effectiveness of management strategies. The Board reviews the operating performance against agreed targets and budgets on a regular basis and also exercises a number of reserved powers, including:

- formulating long-term objectives and strategies;
- approving strategic, operational and financial plans;
- monitoring and controlling the Group's operational and financial performance;

- setting the dividend policy;
- approving major acquisitions and disposals, formation of joint ventures and capital transactions; and

Every newly appointed Director receives a comprehensive, formal and tailored induction to ensure that he or she has a proper understanding of the business and operations of the Group and that he or she is fully aware of his or her duties and responsibilities as a director under the applicable rules and requirements. Directors are updated on any developments or changes affecting their obligations from time to time. In June 2016, the Company, together with its legal adviser, organized a training session to provide the Directors with an update on "Hong Kong Stock Exchange Review on Annual Report of Listing Issuers".

Risk Management and Internal Control System

Based on the experience in operation control over the years, the Company has put in place an integrated system of risk management and internal control. The system adopts the globally recognised framework outlined by the Committee of Sponsoring Organisations of the Treadway Commission (“COSO”), taking into account the Group’s business, operational and financial risks, corporate culture and management philosophy. The system is designed to (i) achieve effectiveness and efficiency of operations; (ii) enhance the reliability of internal and external financial

reporting; and (iii) ensure compliance with the applicable laws and regulations. The system serves to provide reasonable, but not absolute, assurance against material misstatement, fraud or loss. During the year, the Group continued to improve its internal control system aiming at providing effective control and strong support, reflected mainly in the following aspects:

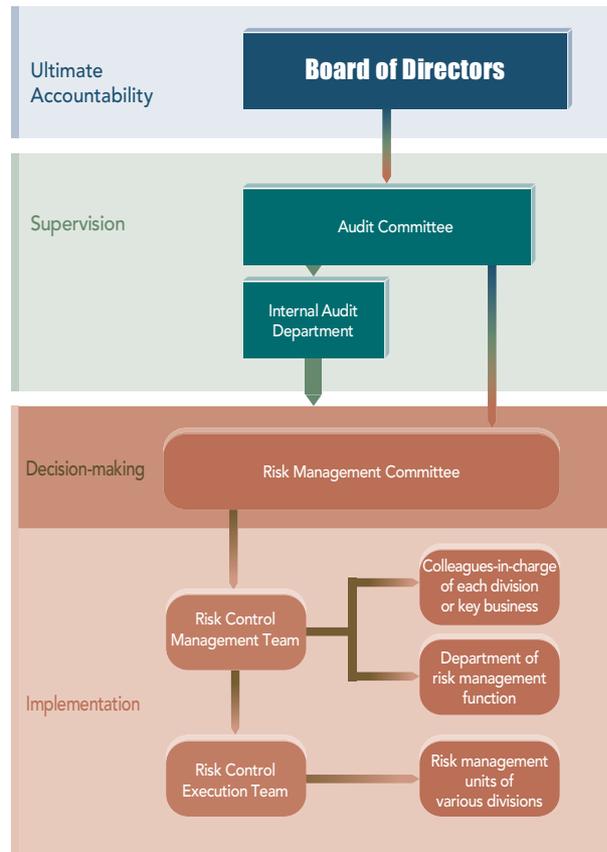

- (1) The normal operation of the organizational structure set up on the basis of the COSO risk management and internal control framework is promoted continuously, under which the internal control organization structure is depicted as follows:

The Company has established a top-down organizational and management structure with clear-cut responsibilities and authorities for internal control purposes, embracing three levels which are responsible for ultimate accountability, supervision and implementation, respectively: (i) the Board bears the ultimate accountability and has the ultimate authority in internal control management. It is externally accountable to the Shareholders for corporate governance responsibility, whereas internally it acts as the highest authority to foster internal control; (ii) the Audit Committee is responsible for supervising the establishment and operation of the internal control system by the

management, monitoring the Group’s risk management and internal control procedures and advising the Board on the effectiveness thereof. Preliminary assessment on the effectiveness of risk management and internal control are conducted by the Internal Audit Department which reports directly to the Audit Committee; (iii) the implementation level comprises a decision-making group, a coordination body (namely, the internal control function of Internal Audit Department, which is responsible for supporting the planning and establishment of the Group’s internal control system, coordinating the promotion and implementation of the internal control structures in different systems, and organising examination on the effectiveness of the internal control and assessment of risks) and operational and functional divisions.

(2) Risk management organization structure is depicted as follows:

The Company has established a top-down organizational and management structure with clear-cut responsibilities and authorities for risk management purposes, embracing four levels which are responsible for ultimate accountability, supervision, decision-making and implementation, respectively: (i) the Board bears the ultimate accountability in the risk management of the Company. It has the right to provide guidance and final decision on the Company's risk management policies and systems as well as response plans, and bears the ultimate accountability for the effectiveness of the Company's risk management; (ii) the Audit Committee and its Internal Audit Department assess and monitor the implementation of the Company's risk management, and inform the Risk Management Committee of such result and submit to the Board in a timely manner; (iii) the Risk Management Committee is comprised of the Company's management and Group Vice President for a term of two years. Its basic duties include but not limited to discussing and approving the policies and systems relating to risk management, making decision on risk management related works, discussing and approving the annual work plan and

annual report on risk management, deciding solutions for major issues arisen during the operation of the Company as well as reporting regularly to the Audit Committee and/or the management in respect of risk management; (iv) the implementation level comprises a risk control management group (including heads of departments or key business heads, and risk management functions performed by the Internal Audit Department) and a risk control execution group (i.e. staff designated for risk management of each system).

During the year, in light of the changes in the Company's organisational structure, staff and business flow, the staff arrangement under the internal control function of Internal Audit Department structure was promptly updated and necessary training was carried out by the Company. The Internal Control Team reported at every meeting of the Audit Committee in relation to the Group's risk management, internal control plans and progress for the supervision and guidance of the Audit Committee and the Board.

- (3) Possession of effective and forward-looking information on strategic management and operation management and financial and accounting management systems supports the supervision of implementation and performance of business strategies and plans. Timely and regular operational reports and monthly financial updates are submitted to and reviewed by the Senior Management, the Board or its designated Committees. This allows them to monitor and control situations against the established annual operating and financial targets and to consider necessary actions as well as to ensure such actions are being carried out promptly so as to remedy any significant failures or weaknesses.
- (4) The Internal Control Manual of Li Ning Company Limited (the "Internal Control Manual"), which represents the codification of the Group's existing internal control policies and operational procedures to enhance its internal control system, is implemented on an ongoing basis. The Internal Control Manual currently covers areas including the management procedures in respect of sales and trade receivables, procurement and trade payables, inventories, capital, financial reporting, taxation, management functions of the Group, administration and human resources, intellectual property rights, export and fixed assets. Systematic changes to the Internal Control Manual have to be carried out at least once a year, depending on the needs for business changes and procedural refinement, so as to further improve and monitor the effectiveness of the internal control system on a continuing basis. With centralized arrangement and coordination of the internal control function of Internal Audit Department, key items of internal control and the specific control procedures set out in the Internal Control Manual were updated by the relevant departments during 2016. Such updated procedures have been implemented during the year.
- (5) An effective annual self-assessment and evaluation mechanism under the internal control framework was established with satisfactory results and attained the following goals:
- (i) fostering middle and senior management to review and comment on whether control targets at corporate level can be achieved, and to identify inadequacy and make improvement in a timely manner;
 - (ii) prompting the persons in charge of business processes to actively conduct process review on procedural control, test the design and execution effectiveness, identify problems in a timely manner and formulate improvement measures; and
 - (iii) assisting the Audit Committee and the Board in assessing the effectiveness of the Company's internal control system as a whole.
- (6) Independent reviews of risks management and internal control in relation to key operations, financial and compliance functions are performed by the Internal Audit Department. Significant issues, if any, together with recommendations for improvement, are reported to the Audit Committee or the Board.
- (7) In order to support the rapid and healthy development of business diversification of the Group, the Company conducts annual risk review at corporate level and assesses risks and risk management controls on the key business aspects based on the Risk Management Manual of Li Ning Company Limited.

ANNUAL REVIEW

The Board is fully aware of its accountability in respect of the Group's risk management and internal control systems and its responsibility for reviewing the effectiveness of the systems. Such systems are designed to manage rather than eliminate the risk of failure to achieve business objectives, and can only provide reasonable but not absolute assurance against material misstatement or loss. The Group's internal control system is subject to continuous review and improvement to enable timely responses to any changing risks facing the Group.

A comprehensive review on the effectiveness of the Group's risk management and internal control system is conducted by the Board annually, covering all material controls including financial, operational and compliance monitoring. The review is performed internally on a self-assessment approach (CSA) with a complete set of reporting forms. Colleagues-in-charge of each division and department are requested to fill in the self-assessment review questionnaire against key items of internal control. In 2016, the Company continued to improve methods for self-assessment, which included extending the scope of the self-assessment. The procedural control of self-assessment covered various divisions or departments in light of the Company's organisational restructuring and business expansion. In addition, members of the Senior Management were required to assess the effectiveness of the corporate internal control system according to the outlines of the COSO internal control system, including control environment and risk assessment, information and communication. The review process has enabled the colleagues-in-charge to verify whether the internal control system is operated as intended, to identify failures or weaknesses and to take relevant remedial actions. The Internal Audit Department also carried out independent

examination and analysis on the review process and the results, and submitted a declaration to the Audit Committee and the Board certifying the adequacy and effectiveness of the Group's internal control system.

The results of the review for the year ended 31 December 2016 have been reported to the Audit Committee and the Board. According to the results, the Audit Committee and the Board confirm that the systems and procedures of the Group's risk management and internal control are in good order and are able to identify, control and report on significant risks involved in achieving the Group's strategic objectives. The areas of the systems and procedures pending further improvement have been identified and remedial actions have either been taken or designated to be taken. No material weaknesses have been identified by the Group so far and there are no significant areas of concern which may affect the Shareholders.

The Audit Committee and the Board have also received the annual review results with regard to the adequacy of resources, qualifications and experience of the Group's accounting and financial reporting staff and the sufficiency of their training programmes and budget. In accordance with such results, the Audit Committee and the Board are of the view that the Group has adequate workforce to fulfil accounting and financial reporting duties. These personnel possess necessary professional qualifications and practical experience to effectively perform their respective functions, and there have been appropriate training programmes and related budget for the staff.

The Board considers that the Group's internal control system is adequate and effective and the Company has complied with the Code Provisions of the Corporate Governance Code for the year ended 31 December 2016.

INTERNAL AUDIT

The Internal Audit Department was established soon after the Company's listing on the Stock Exchange in 2004. The main functions of the Internal Audit Department are reviewing the operational and financial conditions of the Group to disclose potential risks, and following up with related remedial measures, with a view to continuously enhancing the operational effectiveness and efficiency of the Group. The Internal Audit Department plays an important role in the Group's internal control and risk management framework with an aim to provide the Audit Committee and the Board with objective assurance that the internal control system and risk management system are effectively maintained and operated and that the risks associated with the achievement of business objectives are being managed properly and circumvented. The Internal Audit

Department reports directly to the CFO and refers matters to the Audit Committee directly if necessary. The head of the Internal Audit Department attended every meeting of the Audit Committee and maintained constructive communications with the Company's external auditor during 2016.
